

EUROPEAN RESEARCH INFRASTRUCTURES IN HORIZON 2020. OPPORTUNITIES FOR RUSSIA

**MARINE MELKONYAN
RESEARCH INFRASTRUCTURES NCP, MISIS**

St. Petersburg, 07.10.2016

RESEARCH INFRASTRUCTURES

include facilities, resources and services that are used by the research communities to conduct research and foster innovation in their fields

INCLUDE:

- ❖ Major scientific equipment or sets of instruments
- ❖ Knowledge-based resources such as collections, archives or scientific data
- ❖ e-infrastructures, such as data and computing systems, and communication networks

THE EUROPEAN RESEARCH INFRASTRUCTURE LANDSCAPE

MERIL
MAPPING OF THE EUROPEAN
RESEARCH INFRASTRUCTURE
LANDSCAPE

**MERIL project
under FP7:
2010 - 2012**

**MERIL-2 project
under Horizon 2020
2016 - 2020**

594 Research infrastructures
(Pan-European/regional/national) of
European importance in different
thematic domains

<https://portal.meril.eu/>

Networks of National Research Infrastructures
http://ec.europa.eu/research/infrastructures/index_en.cfm?pg=mapri

Pan-European Research Infrastructures
http://ec.europa.eu/research/infrastructures/index_en.cfm?pg=mapri_european

DEVELOPING THE EUROPEAN RESEARCH INFRASTRUCTURES FOR 2020 AND BEYOND

ESFRI

IDENTIFYING NEW RESEARCH INFRASTRUCTURES OR MAJOR UP-GRADES TO EXISTING ONES

EUROPEAN STRATEGIC FORUM ON RESEARCH INFRASTRUCTURES, ESFRI (2002 r.)

I ESFRI ROADMAP (2006), 35 PROJECTS

II ESFRI ROADMAP (2008), III - 2010 48 PROJECTS

IV ESFRI ROADMAP 2016

IMPLEMENTATION OF THREE ROADMAPS FOR 60% BY 2016

IV ROADMAP: STRUCTURE, APPROACHES, PRINCIPLES

21 ESFRI PROJECTS
9 (2008); 6 (2010),
6 (new!)

**29 ESFRI
LANDMARKS**

Projects and Landscapes of ESFRI

Roadmap 2016 reflect different stages of infrastructures' life cycle

In focus: maturity, excellence, sustainability, European value, the need for support

<http://www.esfri.eu/roadmap-2016>

THEMATIC DOMAINS OF ESFRI ROADMAP 2016

ROADMAP 2016

Research & Innovation

Knowledge Transfer

Grand Societal Challenges

Emerging Technologies

European Competitiveness

International Cooperation

Global Impact

Training

landscape analysis

Common Strategy

Scientific Excellence

21 Projects

research policy

European Research Area

29 Landmarks

Environment (ENV)
5 + 5

Health & Food (HF)
8 + 6

Social & Cultural Innovation (SCI)
1 + 5

Physical Sciences & Engineering
3 + 11

GLOBAL VALUE OF ESFRI ROADMAP 2016

- ❖ Some established infrastructures have become or have been conceived from the beginning as globalized undertakings, made affordable and successful with a broad international effort (CERN, Square Kilometer Array (SKA), European Spallation Source ERIC, European XFEL, FAIR, HL-LHC, ILL 20/20, SPIRAL2)
- ❖ The global impact of the ESFRI RIs has prompted a reflection in two main fora: **the Global Science Forum (GSF, OECD)** and G8+5 группы Group of Senior Officials (GSO), tasked with defining a strategy for Global Research Infrastructures (GRI).
- ❖ The ESFRI methodology can be applied and implemented at national / global level

FAIR

Facility for Antiproton
and Ion Research
in Europe GmbH

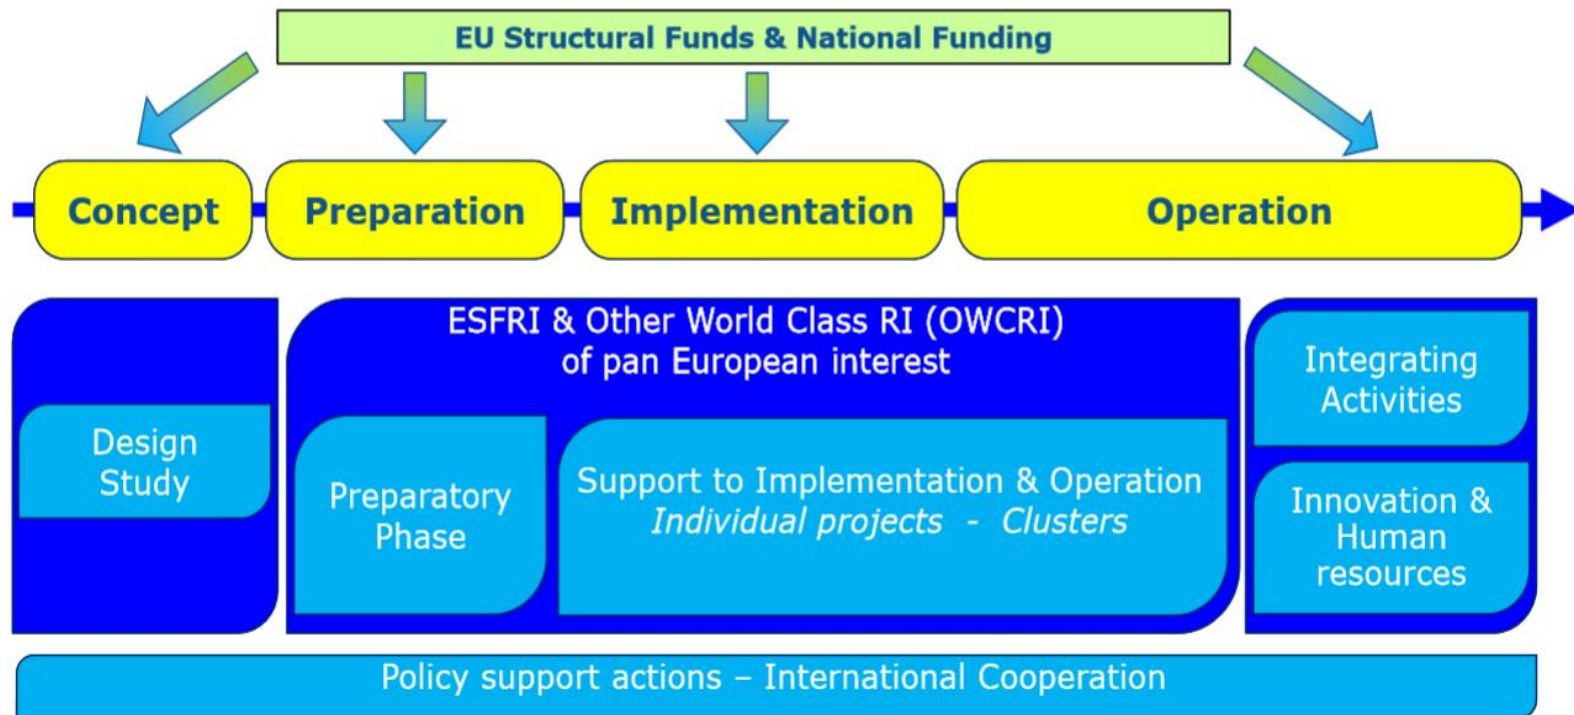

china eu india japan korea russia usa

European Organization for Nuclear Research

A Coherent Toolbox of Activities

FINANCIAL INSTRUMENTS SUPPORTING EUROPEAN RESEARCH INFRASTRUCTURES

- European programme for Research & Innovation «Horizon 2020»
- European Structural & Investment Funds (ESIFs)
- European Fund for Strategic Investments (EFSI)
- European Investment Bank (EIB)
- Governments of EU Member States (Germany, France, United Kingdom, Italy)
- International partners in the Global Research Infrastructures (BRICS, USA, Canada)

Pillar 1. Excellent Science

- European Research Council, ERC
- Future & Emerging Technologies, FET
- Marie Skłodowska Curie Actions, MSCA
- **RESEARCH INFRASTRUCTURES (including e-infrastructure), RIs ~ € 2.4 billion**

RESEARCH INFRASTRUCTURES IN HORIZON 2020

I. **Developing** the European RIs for 2020 and beyond:

- Developing **new world-class RIs**
- **Integrating and opening national and regional RIs of European interest**
- Development, deployment and operation of ICT based **e-Infrastructures**

II. **Fostering the innovation potential of RIs and their human resources**

III. **Reinforcing European RI policy and international cooperation**

<https://ec.europa.eu/digital-single-market/en/news/open-innovation-open-science-open-world-vision-europe>

RESEARCH INFRASTRUCTURES WORK PROGRAMME 2014-2015, 4 CALLS, 22 TOPICS. OUTCOME

**CALL 1: DEVELOPING
NEW WORLD-CLASS RIs
INFRADEV-1-2014**

**CALL 2: INTEGRATING
AND OPENING RIs OF
EUROPEAN INTEREST
H2020-INFRAIA-2014-2015**

**CALL 3:
E-INFRASTRUCTURES**

**CALL 4: SUPPORT TO
INNOVATION, HUMAN
RESOURCES, POLICY
AND INCO FOR RIs
H2020-INFRA SUPP-2014-
2015**

102 SUPPORTED PROJECTS IN CORDIS DATA BASE

http://cordis.europa.eu/projects/home_en.html

CREMLIN shall improve and strengthen the relations and networks between European and Russian research infrastructures both at a scientific level and at a research policy level

RESEARCH INFRASTRUCTURES. WORK PROGRAMME 2016-2017

5 CALLS – 15 TOPICS

FORTHCOMING CALLS UNDER HORIZON 2020 (I)

I. Call: Design Studies

Topic identifier: INFRADEV-01-2017

Types of action: RIA Research and Innovation action

Opening date: **08.12.2016** Deadline: **29.03.2017** 17:00:00

Model: **single-stage**

II. Call: Fostering co-innovation for future detection and imaging technologies

Topic identifier: INFRAINNOV-01-2017

Opening date: **08.12.2016** Deadline: **29.03.2017** 17:00:0

Types of action: RIA Research and Innovation action

Model: **single-stage**

III. Topic: Policy and international cooperation measures for research infrastructures

Topic identifier: **INFRASUPP-02-2017:**

Opening date: **08.12.2016** Deadline: **29.03.2017** 17:00:00

Types of action: CSA Coordination and support action

Model: single-stage

FORTHCOMING CALLS UNDER HORIZON 2020 (II)

I. Topic: Data and Distributed Computing e-infrastructures for Open Science

Topic identifier: **EINFRA-12-2017**

Opening date: **08.12.2016**, Deadline: **29.03.2017 17:00:0**

Types of action: RIA Research and Innovation action

Model: single-stage

II. Topic: Platform-driven e-infrastructure innovation

Topic identifier: **EINFRA-21-2017**

Opening date: **08.12.2016** Deadline: **29.03.2017 17:00:00**

Types of action: RIA Research and Innovation action

Model: single-stage

ACCESS TO RESEARCH INFRASTRUCTURES UNDER HORIZON 2020

TRANS-NATIONAL ACCESS (TA)

free of charge' provision of access to a RI to selected researchers or research teams usually working in a country other than the country where the RI is located

in person ('hands-on'), to users visiting RI (e.g. access to a research vessel)

remote scientific services, no visit needed (performance of sample analysis)

Third country users: up to 20% of the access can be provided to user teams with a majority of users working in third countries

Information about TA call in the web site:
http://www.rich2020.eu/tas_calls

VIRTUAL ACCESS (VA)

Free of charge' provision of access to widely used resources needed for research that are openly and freely available through communication networks

Only specific requirements such as registration, authentication and/or authorisation of users (e.g. for access to sensitive data)

No need for a competitive selection of users, to identify users, to visit the infrastructure to get access

Open Innovation, Open Science, Open to the World - a vision for Europe ("Three Os")

Open Science represents a new approach to the scientific process, based on cooperative work and new ways of diffusing knowledge by using digital technologies and new collaborative tools.

With the adoption of the Digital Single Markets strategy on 6 May 2015, the Commission announced the launch of a cloud for research data – the 'research open science cloud'. The 'European Open Science Cloud, EOSC' aims to create a trusted environment for hosting and processing research data to support EU science in its global leading role.

<http://www.eurobioimaging.eu/>

<https://www.elixir-europe.org/>

The Research Data Alliance (RDA, 2013) is a global forum to enable open sharing of scientific data across disciplines, technologies and countries. <https://rd-alliance.org/>

ERIC- EUROPEAN CONSORTIUM FOR RESEARCH INFRASTRUCTURES

ERIC is a **legal instrument** at EU level, to facilitate the joint establishment and operation of Research Infrastructures of European interest in different thematic domains

ERIC can be used for establishing new research infrastructures or for operating existing research infrastructures when members consider it useful to change their legal structures to become an ERIC.

- ✓ Main members of ERIC are 3 organizations from 3 different EU Member or Associated States, but ERIC is **open to organizations from third countries** (membership fee in different forms)
- ✓ Clear rules and procedures of the consortium
- ✓ A lighter process than creating a treaty based international organization

https://ec.europa.eu/research/infrastructures/index_en.cfm?pg=eric

**ERIC
PRACTICAL
GUIDELINES
2015**

HORIZON 2020. EUROPEAN APPROACH TO COLLABORATION WITH RUSSIA

- ❖ Support multi-lateral cooperation on research infrastructures with Russia in one or several of the following areas: Arctic research, marine science, biodiversity, food research and medicine
- ❖ Develop cooperation between European research infrastructures and **the Russian Mega Science** facilities, including the underpinning e-infrastructure:

The projects **FAIR** and **NICA** were included to the ESFRI Roadmap 2016

Nuclotron - based
Ion Collider facility

<http://nica.jinr.ru/>

<http://www.fair-center.eu/>

INTERNATIONAL MEGA SCIENCE PROJECTS WITH THE RUSSIAN PARTICIPATION

International thermonuclear experimental reactor (ITER)
<http://www.iter.org>

ITER's member states:
the EU (is contributing 45%), India, **Russia (9%)**, China, South Korea, Japan, United States

<http://www.fair-center.de>

European XFEL

(<http://www.xfel.eu/en/>)

XFEL Member States:
Denmark, France, Germany, Greece, Hungary, **Italy**, Poland, **Russia**, Slovakia, Spain, Sweden and Switzerland.

Costs amount 1082 million Euro: 54% Germany, 23% Russia, the other international partners between 1 and 3.5%

<http://www.esrf.eu/>

The Large Hadron Collider

(<http://public.web.cern.ch/public/en/LHC/LHC-en.html>)

A large volume detector for low energy neutrino spectroscopy Borexino
Partners: **Italy**, Germany, France, Russia, USA, Poland, Ukraine

EU-RUSSIA S&T COOPERATION IN RIs UNDER HORIZON 2020

From the list of calls in the Horizon 2020 WP 2016 -2017 the Ministry of Education and Science of Russia highlight the following subjects of priority interest for the Russian Federation in the area of Research Infrastructures:

CALL: SUPPORT TO POLICY AND INTERNATIONAL COOPERATION

- INFRASUPP-01-2016: Policy and international cooperation measures for research infrastructures
- INFRASUPP-02-2017: Policy and international cooperation measures for research infrastructures

Joint calls with ESRF under FTP 2014-2020 in 2015

The results: I CALL: 16 proposals, 11 of them have been successful

II CALL: 33 proposals, 13 of them have been successful

Web-site: http://fcpir.ru/participation_in_program/contests/list_of_contests/

Applying for beam time is possible via web-site ESRF on regular basis :

<http://www.esrf.eu/UsersAndScience/UserGuide/Applying>

RESEARCH INFRASTRUCTURES. WHAT'S THE NEXT

- ❖ European Commission has started preparations of the **new H2020 Work Programme 2018-2020** with a set of consultations with stakeholders in different thematic areas.

The first draft will be ready by May 2017, the new calls are scheduled in Autumn 2017

<https://ec.europa.eu/programmes/horizon2020/en/what-work-programme>

The preparation of the Research Infrastructures (including e-Infrastructures) part of the WP 2018-2020 started at the beginning of 2016 and is currently ongoing. Main inputs will be gathered, in particular from the Research Infrastructures Advisory Group and from consultation with major stakeholders (e.g. ESFRI, e-IRG, EIROFORUM, ERICs, representatives from Member States and Associated countries).

- ❖ **FP9: Towards the next Framework Programme for R&I**

FP9 most likely will cover the period 2021 – 2027, it is due to start on 1 January 2021.

Discussions and preparations for the next (9th) FP have already begun.

A High level group will work on the “Future Orientations” of the FP until summer 2017, EC is starting consultations with stakeholders in autumn 2017

The first version will be ready by the end of 2017 – beginning of 2018

Group of Senior Officials on Global RIs(GSO). Pilot projects

LNGS	Italy	Russian Federation		Joint Institute for Nuclear Research, Dubna, Russia	Bednyakov Vadim, director Laboratory of Nuclear Problem of JINR, e-mail: bedny@jinr.ru, Tel.: +7 49621 65263 (office), Mobile: +7 916 1587525
LNLS	Brazil	Russian Federation	Studying the features of electronic and crystal structures of complex oxides, multiferroics, high-temperature superconductors, magnetic compounds, systems with strong electron correlations using synchrotron radiation. Further development of XAFS- spectroscopy, anomalous x-ray diffraction, resonant inelastic X-ray scattering (RIXS), the x-ray magnetic circular dichroism.	National Research Nuclear University "MEPhI": The research group is working with original software for processing EXAFS spectra. Similar research has been conducted in cooperation with the following synchrotron centers: LURE (Orsay, France), DESY (Hamburg, Germany), MAX-lab (Lund, Sweden), BESSY-II (Berlin, Germany), SOLEIL (France), Kurchatov source of synchrotron radiation (Moscow, Russia).	
LNNANO	Brazil	Russian Federation	Characterizing advanced materials, participating in the compiling of «Big Data», virtual databases.	The National University of Science and Technology "MISIS": MISIS has performed significant groundwork in the area of nanotechnological research. The university set up a scientific and educational center "Nanomaterials and Nanotechnologies" and research centers: "Structural Ceramic Nanomaterials", "Inorganic Nanomaterials", "Hybrid Nanostructured Materials".	
MMC IMPC	Italy	Russian Federation	Implementation of joint research programs.	Department of Medical Sciences of the Russian Academy of Sciences: Federal Research Center Institute Cytology and Genetics SB RAS The department has performed significant scientific groundwork in a broad spectrum of research in the field of medicine	Mikhail Moshkin Professor and Head Department of Genetic Resources of laboratory Animals Cell:8-923-241-0578 mmp@bionet.nsc.ru
MMC IMPC	Italy	Russian Federation	Exchanging lines of mice and information on the conducted research. Conducting joint research.	Central Research Institute of Tuberculosis The institute set up a registered at the US National Institute of Health mouse farm (registration number of the work permit A5502). International Index of the farm: Cit. The researchers conduct studies of experimental models of tuberculosis in mice.
